Success Summary. Indicate the status of your program – compiles successfully? runs without errors? gives expected (correct) results? specific difficulties not overcome? specific requirements not met? *Etc*

Program compiles successfully and runs the test provided with no differences. I added a try/catch block to the Resize function but was unable to trigger it at either compile or runtime. As a result I don't know if the try/catch Will function as expected

(A rather broad/general guide - may supplement/replace with something more detailed tailored for program involved.)
